

Inventory of DLSU Print Periodical Collection

by Elizabeth Padilla

The inventory of the DLSU print periodical collection was concluded in February 2005, a year after the inventory process was integrated in the daily work routine of the staff. It was conducted to establish the accuracy and integrity of the bibliographic records of the periodical holdings. The master list of periodical titles currently accessible at the online catalog became the reference guide for the collection inventory.

A total of 4108 journal titles was searched and matched with their

corresponding print copies.

Findings revealed the following:

- 3390 titles (82%) have corresponding print copies
- 718 titles (17%) are not represented in the collection
- 855 titles are in the collection but not represented in the list

The periodicals section will turn over the inventory records to the technical services unit once it has completed its post inventory in May. The technical services unit has been tasked to update, correct, and complete the entries of the master list.
