### College of Science

**INTSTA2** – Introduction to Statistics 2

| Prerequisite: INTSTA1          | Prerequisite to:                             |  |
|--------------------------------|--|--|
| Instructor:Consultation Hours: | Contact details:<br>Class Schedule and Room: |  |

### **Course Description**

INTSTA2 (Introduction to Statistics 2) is a second course in statistics covering chi-square and F-distributions, estimation and tests of hypotheses for difference of means, proportion, difference of proportions, variance, ratio variances, regression and correlation analyses, and analysis of variance.

| Learning Outcomes   |   |  |  |  |  |
|---|---|--|--|--|--|
| On completion of this course, the student is expected to present the following learning outcomes in line with |   |  |  |  |  |
| the Expected Lasallian Graduate Attributes (ELGA)   |   |  |  |  |  |
| ELGA  | ELGA Learning Outcome                               |  |  |  |  |
| Critical and Creative Thinker   |   |  |  |  |  |
| Effective Communicator appropriate statistical concepts, methodologies and                                    |   |  |  |  |  |
| Reflective Lifelong Learner technologies in organizing, analyzing and interpreting                            |   |  |  |  |  |
| Service-driven Citizen  | various real-world situations and in coming up with |  |  |  |  |
|   | relevant decisions.                                 |  |  |  |  |

### **Final Course Output**

As evidence of attaining the above learning outcomes, the student is required to do and submit the following during the indicated dates of the term.

| ı | adming the maneated dates of the term           |  |          |
|---|---|--|----------|
|   | Learning Outcome                                | Required Output                        | Due Date |
|   | At the end of the course, the students will be  | Statistical inferences using real-life | Week 13  |
|   | able to apply appropriate statistical concepts, | data                                   |          |
|   | methodologies and technologies in organizing,   |  |          |
|   | analyzing and interpreting various real-world   |  |          |
|   | situations and in coming up with relevant       |  |          |
|   | decisions.                                      |  |          |

### Rubric for assessment

| CRITERIA  | CRITERIA Excellent (4)   |  | Satisfactory (2)   | Needs   |
|---|--|--|--|---|
| Formulation<br>of the<br>Research<br>Problem and<br>Objectives<br>(10%) | Research problem and objectives are clearly defined and significant; Demonstrates evidence that the research problem was researched and designed well. | retes that the problem arched and arched arche |  | Improvement (1) Research problem and objectives are vague and insignificant.                    |
| Applications of Inferential Statistics (40%)                            | ications Statistical analyses Statis ferential are appropriate, are a necessary, and neces   |  | Some statistical analyses are inappropriate and do not lead to the solution of the research problem. | Statistical analyses are inappropriate and do not lead to the solution of the research problem. |
| Depth of<br>Analysis<br>(35%)   | Interpretations and conclusions are correct and relevant with meaningful implications.   | Interpretations and conclusions are correct and relevant   | Some interpretations and conclusions are incorrect and irrelevant                                    | Interpretations and conclusions are incorrect and irrelevant                                    |
| Clarity and<br>Organization<br>of Report<br>(15%)                       | Report is organized logically and presented clearly with effective transitions.  | Report is organized logically and presented clearly.   | Report is organized and some discussions are not clear.  | Report is not organized.  |

# Additional Requirements • 3 Quizzes

- Final Exam
- Computer Output
- Skills Check
- Inquiry Plan / Activities Portfolio

## Learning Plan

|   | ,   |              | ,   |
|---|---|--------------|---|
| LEARNING<br>OUTCOME   | TOPIC   | WEEK<br>NO.  | LEARNING<br>ACTIVITIES  |
| I. At the end of the course, the students will be able to apply appropriate statistical concepts, methodologies and technologies in organizing, analyzing and interpreting various real-world situations and in coming up with relevant decisions | III. ESTIMATION OF PARAMETERS  2.1 Types of Estimates 2.2 Estimating the Mean 2.3 Estimating the Difference Between Two Means 2.4 Estimating a Proportion 2.5 Estimating the Difference Between Two Proportions 2.6 Estimating the Variance 2.7 Estimating the Ratio of Two Variances 2.8 Sample Size Determination   | Weeks<br>1-3 | Computer Laboratory Activity: Estimation of means, proportions and variances in real-life problems  |
| III.  | IV. HYPOTHESIS TESTING  3.1 Elements of a Statistical Test of Hypothesis 3.2 One-Tailed and Two-Tailed Tests and P-Value 3.3 Steps in Testing Hypotheses 3.4 Tests Concerning One Mean 3.5 Tests Concerning the Difference Between Two Means 3.6 Tests Concerning a Proportion 3.7 Tests Concerning the Difference Between Two Proportions 3.8 Tests Concerning the | Weeks<br>4-7 | Eliciting Prior Knowledge: Formulating Hypotheses  Computer Laboratory Activity: Actual data test, χ²-test and F-test using critical region approach and p-value approach |

| IV. | Variance 3.9 Tests Concerning the Ratio of Two Variances  V. CHI-SQUARE TESTS 4.1 Test of Homogeneity of More Than Two Proportions 4.2 Testing for Independence  | Week 8         | Computer Laboratory<br>Activity: Actual data<br>analysis involving chi-<br>square tests          |
|-----|--|----------------|--|
| V.  | 4.3 Goodness-of-Fit Test  VI. ANALYSIS OF VARIANCE  5.1 Assumptions of the Analysis of Variance 5.2 Test on the Equality of Several Variances 5.3 One-Way Analysis of Variance 5.4 Post Hoc Analysis: Tukey-Kramer Test 5.5 Two-Way Analysis of Variance           | Weeks 9-<br>11 | Computer Laboratory<br>Activity: Actual data<br>analysis involving ANOVA                         |
| VI. | VII. REGRESSION AND CORRELATION  6.1 Correlation Analysis 6.1.1 Pearson's Correlation Coefficient 6.1.2 Test of Significance of ρ 6.2 Regression Analysis 6.2.1 Simple Linear Regression Model 6.2.2 Coefficient of Determination 6.2.3 Test of Significance of β₁ | Week 12        | Computer Laboratory Activity: Actual data analysis involving correlation and regression analyses |
|     | LEARNING OUTPUT  | Week 13        | Statistical inferences using real-life data  |
|     | FINAL EXAMINATION  | Week 14        |  |

### **Class Policies**

- 1. The required minimum number of quizzes for a 3-unit course is 3, and 4 for 4-unit course. No part of the final exam may be considered as one quiz.
- 2. Cancellation of the lowest quiz is not allowed even if the number of quizzes exceeds the required minimum number of quizzes.
- 3. As a general policy, no special or make-up tests for missed exams other than the final examination will be given. However, a faculty member may give special exams for
  - A. approved absences (where the student concerned officially represented the University at some function or activity).
  - B. absences due to serious illness which require hospitalization, death in the family and other reasons which the faculty member deems meritorious.
- 4. If a student missed two (2) examinations, then he/she will be required to take a make up for the second missed examination.
- 5. If the student has no valid reason for missing an exam (for example, the student was not prepared to take the exam) then the student receives 0% for the missed guiz.
- 6. Students who get at least 89% in every quiz are exempted from taking the final examination. Their final grade will be based on the average of their quizzes and other prefinal course requirements. The final grade of exempted students who opt to take the final examination will be based on the prescribed computation of final grades inclusive of a final examination. Students who missed and/or took any special/make-up quiz will not be eligible for exemption.
- 7. Learning outputs are required and not optional to pass the course.
- 8. Mobile phones and other forms of communication devices should be on silent mode or turned off during class.
- 9. Students are expected to be attentive and exhibit the behavior of a mature and responsible individual during class. They are also expected to come to class on time and prepared.
- 10. Sleeping, bringing in food and drinks, and wearing a cap and sunglasses in class are not allowed.
- 11. Students who wish to go to the washroom must politely ask permission and, if given such, they should be back in class within 5 minutes. Only one student at a time may be allowed to leave the classroom for this purpose.
- 12. Students who are absent from the class for more than 5 meetings will get a final grade of 0.0 in the course.
- 13. Only students who are officially enrolled in the course are allowed to attend the class meetings.
