College of Science

LINEALG – Linear Algebra for Majors

Prerequisite: MATH114	Prerequisite to:LINPROG, MODEGEO			
Instructor: Consultation Hours:	Contact details:Class Schedule and Room:			

Course Description

This is an introductory course in linear algebra. Topics discussed include matrices, vector spaces, linear transformation and their matrix representation, eigenvalues and eigenvectors and diagonalization.

Learning Outcomes On completion of this course, the student is expected to present the following learning outcomes in line with the Expected Lasallian Graduate Attributes (ELGA) **ELGA** Learning Outcome Critical and Creative Thinker At the end of the course, the student will perform the **Effective Communicator** fundamental operations on matrices as well as Lifelong Learner illustrate the following concepts: vector spaces, Service-Driven Citizen subspaces, linearly independent sets, basis, rank of matrix, dimension of vector space, linear transformation, matrix of linear transformation with respect to different pairs of bases, eigenvalues and eigenvectors.

Final Course Output

As evidence of attaining the above learning outcomes, the student is required to submit the following during the indicated dates of the term.

the indicated dates of the term.		
Learning Outcome	Required Output	Due Date
At the end of the course, the student will apply	Carefully crafted compilation of solved	Week 13
appropriate linear algebraic concepts, thinking	problems (theoretical exercises) that	
processes, tools, and technologies in the	will manifest the application of the	
solution to various conceptual or real-world	concepts learned	
problems.		

Rubric for assessment

CRITERIA	Excellent (4)	Good (3)	Satisfactory (2)	Needs Improvement (1)	
Understanding of mathematical concepts	Shows complete understanding of the underlying mathematical concepts and principles needed to solve the problem.	Shows nearly complete understanding of the problem's mathematical concepts and principles.	Shows some understanding of the mathematical concepts and principles needed to solve the problem.	Shows very limited understanding of the problem's mathematical concepts and principles.	
Clarity of Explanation	Explanation is well-written, complete and unambiguous. Terminologies and symbols are used correctly.	Explanation is clear but few simple details are missed. Terminologies and symbols are used appropriately.	Explanation is little difficult to understand. Some symbols and notations are used inappropriately.	Explanation is difficult to understand.	

Understanding of	Shows correct	Shows correct	Shows correct	Lacks
methods of proof	understanding of	understanding of	understanding of	understanding of
	the method of	the method of	the method of	the method of
	proof. Statements	proof. The proof	proof but there are	proof but an
	are logical and the	proceeded	major errors in	attempt to solve
	desired conclusion	logically except for	reasoning.	the problem is
	is arrived at.	a few minor errors.		evident.

Grading System				Scale:	
	FOR FOR STUDENTS EXEMPTED with FINAL EXAM		95-100% 89-94% 83-88%	4.0 3.5 3.0	
	STUDENTS (w/out Final Exam)	with no missed quiz	With one missed quiz	78-82% 72-77% 66-71%	2.5 2.0 1.5
Average of quizzes & Project	95%	60%	50%	60-65% <60%	1.0 0.0
Class participation & Lab exercises	5%	10%	10%		
Final exam	-	30%	40%

Class Policies

- 1. The required minimum number of quizzes for a 3-unit course is 3, and 4 for 4-unit course. No part of the final exam may be considered as one quiz.
- 2. Cancellation of the lowest quiz is not allowed even if the number of quizzes exceeds the required minimum number of quizzes.
- 3. As a general policy, no special or make-up tests for missed exams other than the final examination will be given. However, a faculty member may give special exams for
 - A. approved absences (where the student concerned officially represented the University at some function or activity).
 - B. absences due to serious illness which require hospitalization, death in the family and other reasons which the faculty member deems meritorious.
- 4. If a student missed two (2) examinations, then he/she will be required to take a make up for the second missed examination.
- 5. If the student has no valid reason for missing an exam (for example, the student was not prepared to take the exam) then the student receives 0% for the missed guiz.
- 6. Students who get at least 89% in every quiz are exempted from taking the final examination. Their final grade will be based on the average of their quizzes and other prefinal course requirements. The final grade of exempted students who opt to take the final examination will be based on the prescribed computation of final grades inclusive of a final examination. Students who missed and/or took any special/make-up quiz will not be eligible for exemption.
- 7. Learning outputs are required and not optional to pass the course.
- 8. Mobile phones and other forms of communication devices should be on silent mode or turned off during class.
- 9. Students are expected to be attentive and exhibit the behavior of a mature and responsible individual during class. They are also expected to come to class on time and prepared.
- 10. Sleeping, bringing in food and drinks, and wearing a cap and sunglasses in class are not allowed.
- 11. Students who wish to go to the washroom must politely ask permission and, if given such, they should be back in class within 5 minutes. Only one student at a time may be allowed to leave the classroom for this purpose.
- 12. Students who are absent from the class for more than 5 meetings will get a final grade of 0.0 in the course.
- 13. Only students who are officially enrolled in the course are allowed to attend the class meetings.
