

# DE LA SALLE UNIVERSITY

## College of Science

MATH116 – Mathematics Analysis 4

Prerequisite: MATH115	Prerequisite to: ADVACA1, NUMEANL

Instructor:	Contact details:
Consultation Hours:	Class Schedule and Room:

### **Course Description**

A continuation of MATH115 (Analysis 3). It covers vectors in the plane and 3-dimensional space, directional derivatives and gradients, applications of partial derivatives to extrema of functions of several variables, evaluation of multiple integrals in spherical and cylindrical coordinates.

### 

### **Final Course Output**

As evidence of attaining the above learning outcomes, the student is required to submit the following during the indicated dates of the term.

the indicated dates of the term.		
Learning Outcome	Required Output	Due Date
At the end of the course, the student will be able to draw planes and lines in 3-dimensional space, apply the calculus concepts to vector-valued functions, locate extrema of functions of	Collaborative activity on exploring use of math software in sketching graphs of functions in 3-dimensional space.	End of 7 <sup>th</sup> week
two variables and apply directional derivatives and gradient in solving real world problems	Collaborative activity in locating maximum and minimum values of 2 functions of 2 variables and identifying at least 1 real world application of directional derivatives and gradient.	1 week before final exam

### **Rubric for assessment**

CRITERIA	Excellent/4	Satisfactory/3	Developing/2	Needs Improvement/1
Understanding (50%)	The solution shows a deep understanding of the problem including the ability to identify the appropriate mathematical concepts and information necessary for its solution.	The solution shows that student has a broad understanding of the problem and the major concepts necessary for its solution.	The solution is not complete indicating that parts of the problem are not understood.	There is no solution, or the solution has no relationship to the task.
Strategies and Procedures (15%)	Uses a very efficient strategy leading directly to a solution. Applies procedures accurately to correctly solve the problem and verifies the result.	Uses strategy that leads to a solution of the problem. All parts are correct and a correct answer is achieved.	Uses a strategy that is partially useful, leading some way toward a solution but not to a full solution of the problem. Some parts may be correct but a correct answer is not achieved.	No evidence of a strategy or procedure uses strategy that does not help solve the problem.

Communication	There is a clear,	There is a clear	There is some use of	There is no

### **Class Policies**

- 1. The required minimum number of quizzes for a 3-unit course is 3, and 4 for 4-unit course. No part of the final exam may be considered as one quiz.
- 2. Cancellation of the lowest quiz is not allowed even if the number of quizzes exceeds the required minimum number of quizzes.
- 3. As a general policy, no special or make-up tests for missed exams other than the final examination will be given. However, a faculty member may give special exams for
  - A. approved absences (where the student concerned officially represented the University at some function or activity).
  - B. absences due to serious illness which require hospitalization, death in the family and other reasons which the faculty member deems meritorious.
- 4. If a student missed two (2) examinations, then he/she will be required to take a make up for the second missed examination.
- 5. If the student has no valid reason for missing an exam (for example, the student was not prepared to take the exam) then the student receives 0% for the missed quiz.
- 6. Students who get at least 89% in every quiz are exempted from taking the final examination. Their final grade will be based on the average of their quizzes and other prefinal course requirements. The final grade of exempted students who opt to take the final examination will be based on the prescribed computation of final grades inclusive of a final examination. Students who missed and/or took any special/make-up quiz will not be eligible for exemption.

- 7. Learning outputs are required and not optional to pass the course.
- 8. Mobile phones and other forms of communication devices should be on silent mode or turned off during class.
- 9. Students are expected to be attentive and exhibit the behavior of a mature and responsible individual during class. They are also expected to come to class on time and prepared.
- 10. Sleeping, bringing in food and drinks, and wearing a cap and sunglasses in class are not allowed.
- 11. Students who wish to go to the washroom must politely ask permission and, if given such, they should be back in class within 5 minutes. Only one student at a time may be allowed to leave the classroom for this purpose.
- 12. Students who are absent from the class for more than 5 meetings will get a final grade of 0.0 in the course.
- 13. Only students who are officially enrolled in the course are allowed to attend the class meetings.
