

**DE LA SALLE UNIVERSITY**  
**College of Science**  
 Department of Mathematics

**MULTIVA**– *Multivariate Analysis*  
 Prerequisite: LINMODE

Prerequisite to:

**Instructor:** \_\_\_\_\_  
**Consultation Hours:** \_\_\_\_\_

**Contact details:** \_\_\_\_\_  
**Class Schedule and Room:** \_\_\_\_\_

**Course Description**

This course is concerned with statistical methods for describing and analyzing multivariate data. Data analysis, while intersecting with one variable, becomes truly fascinating and challenging when several variables are involved.

**Learning Outcomes**

On completion of this course, the student is expected to present the following learning outcomes in line with the Expected Lasallian Graduate Attributes (ELGA)

ELGA	Learning Outcome
Critical and Creative Thinker Effective Communicator Lifelong Learner Service-Driven Citizen	At the end of the course, the student will apply appropriate multivariate techniques, statistical concepts, processes, tools, and technologies in solving various conceptual and real-world problems.

**Final Course Output**

As evidence of attaining the above learning outcomes, the student is required to submit the following during the indicated dates of the term.

Learning Outcome	Required Output	Due Date
At the end of the course, the student will apply appropriate multivariate techniques, statistical concepts, processes, tools, and technologies in solving various conceptual and real-world problems.	An inquiry-based group project highlighting the use of multivariate technique(s) in different problem situations encountered in the real world.	Week 13

**Rubric for assessment**

A. Problem Set				
CRITERIA	Excellent (4)	Good (3)	Satisfactory (2)	Needs Improvement (1)
<b>Formulation of the Research Problem and Objectives (10%)</b>	Research problem and objectives are clearly defined and significant; demonstrates evidence that the research problem was researched and designed well.	Research problem and objectives are clearly defined and significant.	Research problem is clearly defined but some objectives are insignificant.	The solution shows a deep understanding of the problem including the ability to identify the appropriate mathematical concepts and information necessary for its solution.
<b>Correct Application of the Statistical Concepts (35%)</b>	Statistical analyses are appropriate with correct interpretations and relevant conclusions.	Statistical analyses are appropriate with correct interpretations.	Some statistical analyses are inappropriate.	Uses a very efficient strategy leading directly to a solution. Applies procedures accurately to correctly solve the problem and verifies the result.
<b>Depth of Analysis (30%)</b>	The analysis convinces the reader about the wisdom of conclusions, implications and consequences on the basis of statistical methods and findings.	The analysis engages the reader to appreciate the wisdom of conclusions, implications and consequences on the basis of statistical methods and	The analysis has limited ideas that do not explain the wisdom of conclusions, implications and consequences on the basis of statistical methods and findings.	There is a clear, effective explanation, detailing how the problem is solved. There is a precise and appropriate use of mathematical terminology and notation.

		findings.		
<b>Clarity and Organization of Written Report (10%)</b>	Written report is organized logically and presented clearly with effective transitions.	Written report is organized logically and presented clearly.	Written report is organized and some discussions are not clear.	Written report is not organized.
<b>Oral Presentation (15%)</b>	Overall presentation is creative and well organized with innovative ideas.	Overall presentation is creative and well organized.	Overall presentation is organized.	Overall presentation is not organized.

### Additional Requirements

- ✚ Quizzes
- ✚ Class Participation (seatwork and group exercises, homework, recitation)
- ✚ Computer hands-on exercises using SAS and/or STATISTICA
- ✚ Final Examination

### Grading System

				<b>Scale:</b>	
				95-100%	4.0
				89-94%	3.5
				83-88%	3.0
				78-82%	2.5
				72-77%	2.0
				66-71%	1.5
				60-65%	1.0
				<60%	0.0
	<b>FOR EXEMPTED STUDENTS (w/out Final Exam)</b>	<b>FOR STUDENTS with FINAL EXAM</b>			
		<i>with no missed quizzes</i>	<i>with one missed quiz</i>		
Average of quizzes & project	86%	60%	50%		
Class Participation and Lab Exercises	14%	10%	10%		
Final exam		30 %	40%		

### Learning Plan

LEARNING OUTCOME	TOPIC	WEEK NO.	LEARNING ACTIVITIES
At the end of the course, the student will apply appropriate multivariate techniques, statistical concepts, processes, tools, and technologies in solving various conceptual and real-world problems.	<b>I. Preliminaries</b> 1.1 Some Basic Concepts of Multivariate Analysis 1.2 Some Basic Concepts of Multivariate Analysis 1.3 Types of Multivariate Techniques 1.4 Classification of Multivariate Techniques 1.5 Assumption Checking	4 hours / Week 1	Prior knowledge and beliefs survey Concept mapping Library work Group discussion and presentations Computer laboratory activity (SAS) Skills exercises Student self-assessment and reflection
	<b>II. Multivariate Analysis of Variance (MANOVA)</b> 2.1 Description of MANOVA 2.2 Objectives of MANOVA 2.3 Assumptions of MANOVA 2.4 One-Way and Two-Way MANOVA 2.5 Applications of MANOVA 2.6 Post-hoc Analysis	10 hours / Weeks 2-4	
	<b>Quiz No. 1</b>	<b>2 hours / Week 4</b>	
	<b>III. Discriminant Analysis</b> 3.1 Description of Discriminant Analysis 3.2 Objectives of Discriminant Analysis 3.3 Assumptions of	8 hours / Weeks 5-6	

	Discriminant Analysis 3.4 Linear and Quadratic Discriminant Functions 3.5 Classification Tables 3.6 Applications of Discriminant Analysis		
	<b>IV. Factor Analysis</b> 4.1 Description of Factor Analysis 4.2 Objectives of Factor Analysis 4.3 Assumptions of Factor Analysis 4.4 Naming of Factors 4.5 Orthogonal and Oblique Rotations 4.6 How to Select Surrogate Variables for Subsequent Analysis 4.7 How to Use Factor Scores 4.8 Applications of Factor Analysis	8 hours / Weeks 7-8	
	<b>Quiz No. 2</b>	<b>2 hours / Week 9</b>	
	<b>V. Cluster Analysis</b> 5.1 Description of Cluster Analysis 5.2 Assumptions of Cluster Analysis 5.3 Similarity/Dissimilarity Measures 5.4 Types of Clustering Techniques 5.5 Applications of Cluster Analysis	6 hours / Weeks 9-10	
	<b>VI. Canonical Correlation Analysis</b> 6.1 Description of Canonical Correlation Analysis 6.2 Objectives of Canonical Correlation Analysis 6.3 Assumptions of Canonical Correlation Analysis 6.4 Canonical Variates 6.5 Applications of Canonical Correlation Analysis	6 hrs / Weeks 11-12	
	<b>Quiz No. 3</b>	<b>2 hours / Week 12</b>	
	Inquiry-based Group Project	4 hours / Week 13	
	<b>Final Examination</b>	<b>2 hours / Week 14</b>

### Class Policies

1. The required minimum number of quizzes for a 3-unit course is 3, and 4 for 4-unit course. No part of the final exam may be considered as one quiz.
2. Cancellation of the lowest quiz is not allowed even if the number of quizzes exceeds the required minimum number of quizzes.
3. As a general policy, no special or make-up tests for missed exams other than the final examination will be given. However, a faculty member may give special exams for
  - A. approved absences (where the student concerned officially represented the University at some function or activity).
  - B. absences due to serious illness which require hospitalization, death in the family and other reasons which the faculty member deems meritorious.
4. If a student missed two (2) examinations, then he/she will be required to take a make up for the second missed examination.
5. If the student has no valid reason for missing an exam (for example, the student was not prepared to take the exam) then the student receives 0% for the missed quiz.
6. Students who get at least 89% in every quiz are exempted from taking the final examination. Their final grade will be based on the average of their quizzes and other prefinal course requirements. The final grade of exempted students who opt to take the final examination will be based on the prescribed computation of final grades inclusive of a final examination. Students who missed and/or took any special/make-up quiz will not be eligible for exemption.
7. Learning outputs are required and not optional to pass the course.
8. Mobile phones and other forms of communication devices should be on silent mode or turned off during class.
9. Students are expected to be attentive and exhibit the behavior of a mature and responsible individual during class. They are also expected to come to class on time and prepared.
10. Sleeping, bringing in food and drinks, and wearing a cap and sunglasses in class are not allowed.
11. Students who wish to go to the washroom must politely ask permission and, if given such, they should be back in class within 5 minutes. Only one student at a time may be allowed to leave the classroom for this purpose.
12. Students who are absent from the class for more than 5 meetings will get a final grade of 0.0 in the course.
13. Only students who are officially enrolled in the course are allowed to attend the class meetings.
