

The Contributors

Nathaniel R. Alibuyog is a professor at the Mariano Marcos State University (MMSU). He obtained his bachelor at MMSU and his masteral and doctoral degrees at the University of the Philippines Los Baños (UPLB). He is a former vice president of research and extension and currently the dean of the college of engineering.

Maria Graciela Anna S. Arceo is an international consultant in Lao PDR and working on projects related to watershed management, agriculture and irrigation, and policy review on neglected and underutilized species. She obtained her bachelor and masteral degrees in forestry at UPLB. Her research interest includes predictive modeling, watershed management, natural resource management, land cover change analysis using geospatial-based methods, and agriculture, among others.

Juancho B. Balatibat is an Assistant Professor and currently the Chair of the Department of Forest Biological Sciences, College of Forestry and Natural Resources, University of the Philippines Los Baños. He was a graduate of Bachelor of Science in Agriculture (Major in Entomology) in 1981 at the University of the Philippines Los Baños. In 1991, he finished his Master of Science degree (Major cognate: Entomology; Minor Cognate: Wildlife Management) also in the same university. He teaches various undergraduate and graduate courses which include Forest Entomology, Forest Ecology, Taxonomy of Forest Plants, Forest Biodiversity, Nature Interpretation, Wildlife Management and Natural Resource Conservation. In 2010, he was awarded as Outstanding Teacher at the College of Forestry and Natural Resources. His research involvements and interests include Biodiversity Assessment and Monitoring, Forest Canopy Insects, Forest Insect

Pests, and Wildlife Survey and Inventory. He was also instrumental in the establishment of the UPLB-EDC Binhi Biodiversity and Learning Park, located at CFNR campus, which serves as an arboretum for Philippine endemic and threatened tree species.

Randolph Barker is Professor Emeritus of Applied Economics and Management, Cornell University and Emeritus Researcher at the International Rice Research Institute. He was Distinguished Visiting Professor at the School of Economics, De La Salle University from August to October 2016.

Caesar B. Cororaton is a Senior Research Fellow at the Global Issues Initiative of the Virginia Polytechnic Institute and State University. He has been working on global economic modeling focusing on regional trade agreements, country-level modeling focusing on policy reforms and poverty, and community-level modeling focusing on impact evaluation of policy interventions.

Rex Victor O. Cruz is a full professor and UP Scientist III at the University of the Philippines Los Baños (UPLB). He obtained his bachelor and masteral degrees in forestry at UPLB and his doctoral degree at the University of Arizona. He is a former dean of the CFNR (2007-2011) and Chancellor of UPLB (2011-2014). He was also a member of the UN Intergovernmental Panel on Climate Change (IPCC) in 1992-1995; 1997-2000; and 2004-2007.

Lolita L. Garcia worked at the Social Sciences Division of the International Rice Research Institute as Associate Scientist. She finished Master of Science in Agricultural Economics at the University of the Philippines at Los Baños. Her skills include development of survey instruments, implementing data collection and analysis, project management and

coordination. She had worked with collaborating rainfed lowland rice scientists in the National Agricultural Research Systems of South and Southeast Asia in planning, project progress and financial monitoring, and collating and finalizing project reports to the donors.

Arlene Inocencio is a Full Professor and Chair of the School of Economics at De La Salle University (DLSU). She teaches business economics, agricultural and environmental economics, environmental valuation, and public finance. Her research interests include water and irrigation, poverty, public finance, sub-national economic accounts, and other agricultural and environmental issues. She recently published an article in the Water Resources Policy series for the Philippines of Springer. She has also completed a study assessing the performance of the Philippine rice sector in the last three decades published by the International Rice Research Institute and a comprehensive paper on the key challenges and opportunities in agricultural water for the Asia Rice Foundation. Prior to joining DLSU, she was Economist at the International Water Management Institute in Southeast Asia and Africa Regional Offices.

Kei Kajisa is a Professor of Development Economics at School of International Politics, Economics, and Communication, Aoyama Gakuin University. He was an agricultural economist of Social Science Division at the International Rice Research Institute (IRRI) in the Philippines (2006-2012), an Associate Professor at the National Graduate Institute for Policy Studies (GRIPS) in Tokyo (2000-2012), and a Faculty Fellow at the Foundation for Advanced Studies on International Development (FASID) in Tokyo (2000-2012). He received his Ph. D. in Agricultural Economics at Michigan State University in 1999. He has been conducting a large number of household and community surveys in Asia and Africa on agricultural development and the transformation of rural communities.

Albert Lamberte has a bachelor's degree in Civil Engineering from DLSU-Manila and a master's degree in Economics from UP-Diliman. He specializes in Environmental Economics, Water and Wastewater systems and Computable General Equilibrium (CGE) modelling. He is currently a PhD student at the

Crawford School of Public Policy at the Australian National University.

Anna Bella Siriban Manalang formerly Associate Professor of the Department of Industrial Engineering, De La Salle University and now she is the Senior Vice President and Head of Hyundai Assembly and Logistics Operations (HALO), Integrated Quality Management System of Hyundai Asia Resources, Inc. (HARI) and Dean, Hyundai Philippines Academy. She finished her PhD from DLSU and was teaching with DLSU IE and UPIE for a total of 27 years before joining Hyundai.

Tolentino B. Moya is a Professorial Lecturer and a former Professor at the Institute of Environmental Science and Meteorology, College of Science, University of the Philippines, Diliman, Quezon City. He has more than 20 years of experience in basic and field research on various aspects of irrigation and drainage engineering, agriculture, environment, and natural resources. He managed regional and international programs on environmental changes for sustainable development, particularly climate change effects. Dr. Moya had published a number of scientific papers in peer-reviewed journals. As an East-West Center scholar, he completed his MSc in Agricultural Engineering at the University of Hawaii in Honolulu, HI. He graduated from Agricultural and Biological Engineering Department, Cornell University, Ithaca, NY with a PhD in Agricultural Engineering.

Piedad F. Moya is a consultant and former Senior Research Manager at the International Research Institute. Her expertise includes the following; Economics of rice production, rice marketing and policy analysis, economics of water use, impact analysis, and research and project management. She has authored, co-authored and edited at least 4 books, more than 10 monographs, several book chapters and journal articles. She finished her Master of Science in Agricultural Economics at the University of the Philippines at Los Baños. She has been a Graduate Fellow of the Agricultural Development Council (ADC), Rockefeller Foundation, Pre-doctoral Fellow, Economics Program, International Maize and Wheat Centre (CIMMYT), Mexico, and Research Intern, East West Center, Hawaii.

Nicostrato D. Perez is a Senior Scientist in the Environment and Production Technology Division of the International Food Policy Research Institute (IFPRI) based in Washington, DC, USA. He obtained his PhD in Agricultural and Applied Economics in 1995 from Virginia Tech. He has more than 30 years of research experience, working in various capacities in national and international agricultural research centers including the International Rice Research Institute, The WorldFish Center, Philippine Rice Research Institute, and the Center for Development Research of Bonn University in Germany. Geographically, his work covered the regions and countries of Southeast Asia (Philippines, Malaysia, Cambodia, Indonesia and Vietnam); South Pacific (Fiji, Solomon Islands and Vanuatu); Africa (Ghana and Burkina Faso); Germany, India and the USA. His research interests are water and food security, adaptation to climate change, sustainable intensification, and economy-environment policy modeling. His recent works include: the role of agricultural technologies in global food security; climate change adaptation strategies for the agricultural and fisheries sectors; upscaling climate-smart agriculture; impact assessment of climate shocks and extreme events; and investment requirements to achieving nutrition and food security objectives.

Mark W. Rosegrant is Research Fellow Emeritus, International Food Policy Research Institute. With a Ph.D. in Public Policy from the University of Michigan, he has extensive experience in research and policy analysis in agriculture and economic development and the future of world food security, with an emphasis on water resources and other critical natural resource and agricultural policy issues as they impact food security, rural livelihoods and environmental sustainability. He is the author or editor of 15 books and over 100 refereed papers in agricultural economics, water resources and food policy analysis. Rosegrant has won numerous awards, and is a Fellow of the American Association for the Advancement of Science; and a Fellow of the Agricultural and Applied Economics Association.

Mary Rose L. San Valentin is a Researcher of the Agri-Food Policy Platform (formerly Social Sciences Division), International Rice Research Institute, Los Baños, Laguna, Philippines. Most of her research works deal with farm-level data collection through paper-based and computer-assisted surveys, field monitoring

and validation, data processing, data management, and quantitative and qualitative analysis of socio-economic indicators in relation to rice production and water management. She is a graduate of Bachelor of Science in Forestry (Research and Extension) at the University of the Philippines in Los Baños.

Guillermo Q. Tabios III is a Professor at the Institute of Civil Engineering and Research Fellow of the National Hydraulic Research Center at the University of the Philippines (UP) Diliman. He holds B.S. and M.S. degrees in Agricultural Engineering from the University of the Philippines, Los Baños, and Ph.D. in Civil Engineering from Colorado State University. Mr. Tabios teaches and conducts researches in stochastic and computational hydrology and hydraulics, as well as water resources systems engineering. He is an Academician of the National Academy of Science and Technology, a Regular Member of the National Research Council of the Philippines and a Member of the American Geophysical Union and the International Association of Hydro-Environment Engineering and Research. Prior to joining UP Diliman in 1996, he was a Research Associate of the Hydrology and Water Resources Program at Colorado State University, Fort Collins (1985-1987) and Research Faculty of the Hydraulic and Coastal Engineering at University of California, Berkeley (1987-1996).

Cristino L. Tiburan Jr. is an Assistant Professor at the Institute of Renewable Natural Resources, College of Forestry and Natural Resources, UP Los Baños and currently the Faculty Administrator of the Environmental Remote Sensing and Geo-information (ERSG) Laboratory. He finished his BS Forestry cum laude and MS Forestry from the same institution in 1997 and 2003, respectively. In 2012, he obtained his PhD in Global Environmental Studies from Kyoto University, Japan. His research interest is mainly geared towards the use of geospatial-based methods in natural resource management, land cover change analysis, forest measurements, monitoring and evaluation, ecosystems modeling, hazards assessment, predictive modeling, and climate change, among others. He is also one of the authors of the book on "GIS in the Philippines: Principles and Applications in Forestry and Natural Resources – 2nd Edition". He has also served as a resource person in several conferences, workshops, and trainings.

Marites M. Tiongco is a Full Professor and Dean of the School of Economics at the De La Salle University in Manila, Philippines. Dr. Tiongco received her Ph.D. in Agricultural Economics and a B.Sc. in Applied Mathematics from the University of the Philippines Los Baños. Her research work focus on human capital development and poverty, and on the economics of agricultural development with emphasis on critical natural resources and policy issues as they affect food security, food and water safety along the value chain, market access of smallholder producers, agricultural health and productivity, climate change mitigation and adaptation, and environmental sustainability.

Ma.Shiela D. Valencia is an Assistant Scientist of the Agri-Food Policy Platform (formerly Social Sciences Division), International Rice Research Institute. Her research involvements in the institute include economics of rice production, nutrient and water management in rice production, monitoring and evaluation, and impact assessment studies. She obtained her undergraduate degree in Agricultural Economics from the University of the Philippines in Los Baños, Laguna.

Kenji Yoshinaga is Visiting Researcher at the Institute of Regional Vitalization Studies, Toyo University since 2013. Prior to this, he was Professor at the Faculty of Regional Development Studies in the same university from 2005 to 2013. He also served as Visiting Professor at the School of Environment, Resources and International Trade, Hubei University of Economics, Wuhan, China from February to July 2015 and May 2016. Before this, he was Visiting Professor at the College of Public Affairs, Taipei University from September 2014 to January 2015. He was also Visiting professor at the School of Economics, De La Salle University from May 2014 to September 2014. He was Visiting Professor for UNU- IAS, Yokohama from 2006 to 2010.

Guidelines for Authors

EDITORIAL OBJECTIVES

The objective of the *DLSU Business & Economics Review* (*DLSU B&E Review*) is to publish high-quality theoretical, empirical, and methodological research in the fields of accounting, business management, commercial law, economics, finance, and marketing. The *DLSU Business & Economics Review* aims to reach an audience in these six fields and is published twice a year. It is listed in SciVerse Scopus since 2011 (ISSN – 0116-7111) and abstracted and Indexed in EBSCO since 2009. It is included in the Journal Incentive Program of the Commission on Higher Education since 2017. It is also listed in ACI database (www.asean-cites.org). Since it is the major academic journal of the Ramon V. del Rosario College of Business (RVRCOB) and the School of Economics (SOE) of De La Salle University, the articles published must meet high standards of scholarship. They should make significant contributions to the business and economics disciplines, and stimulate interest in further research.

EDITORIAL POLICIES

In line with the objective of the *DLSU B&E Review*, priority shall be given to the following:

- *Theoretical research*: Studies that explore or test theoretical issues and provide additional insights on the issues.
- *Empirical research*: Studies that re-examine important empirical work using alternative theoretical or empirical frameworks, or a different data set. These studies often involve experimental designs and multivariate techniques that examine relationships among variables.
- *Methodological research*: Studies that present new approaches in analyzing data or addressing research problems.
- *Review articles*: Surveys that review and critically evaluate the literature. A review article must go beyond summarizing previous research. It must provide a critical and integrative evaluation of prior research, develop a conceptual framework to explain contradictory findings and suggest directions for further research.

The *DLSU B&E Review* also encourages and welcomes papers that use an interdisciplinary approach (e.g., law and economics) in analyzing issues as well as those that use multiple research methods to support hypotheses.

In addition to the above types of articles, the *DLSU B&E Review* also welcomes critiques, short notes, or comments on previously published articles and consequently, rejoinders from the authors of these articles. Short articles which are not “full-blown” research papers, but whose content adds new insights into or knowledge to their respective fields will be considered. These short articles and comments shall be included under a separate section called “Research Notes.”

Reviews of new books (published no more than one year prior to the review date) will also be considered. The review of a second or a revised edition is discouraged, unless the revisions are substantial. Reviews of textbooks will not be considered. A separate section called “Book Reviews” will be added to the journal issue when necessary.

PUBLICATION DETAILS

The *DLSU B&E Review* is published twice a year. Unless otherwise noted, the ideas, opinions, and conclusions expressed in the *DLSU B&E Review* are those of the authors and not necessarily those of the Editorial Board or the management and staff of De La Salle University.

REVIEW PROCESS

The journal uses double-blind peer review, in which both reviewers and authors are anonymous to each other. Papers are reviewed by an Advisory Editorial Board and invited experts in the fields of accounting, business management, commercial law, economics, finance, and marketing. From the pool of articles reviewed, six or more papers are reviewed again by the Editor-in-Chief. If major revisions are required, the papers are sent back to the authors for revision and re-submission. Each author of a paper not accepted is given a written notice of the action taken on his/her paper. The Editorial Board of the *DLSU B&E Review* reserves the right to keep copies of all papers submitted.

SUBMISSION OF INITIAL MANUSCRIPT

The authors may submit their manuscript together with a cover letter electronically to the Editor-in-Chief at tereso.tullao@dlsu.edu.ph, the Associate Editor at marites.tiongco@dlsu.edu.ph, and to the Editorial Assistant at daisy.mojares@dlsu.edu.ph. Please include in the cover letter the main theme of the paper, the novelty of the paper, and relevant contribution to the DLSU B&E Review.

Before submission, authors must carefully read the guidelines for authors and make sure the paper conforms to these guidelines. For reference, you may want to look at related papers that DLSU Business and Economics Review have published in recent years available online: <http://dlsu-ber.com/publications/>. Each manuscript is checked for plagiarism, and assessed if it is complete, readable and appropriate for this journal. If the manuscript merits having experts to review it, the journal editor will appoint reviewers.

In addition, manuscripts must be copy-edited, not just proof-read, for English fluency and clarity before submitting it for publication. It is highly advisable to have a professional editor copy-edit the main text, list of references, tables and figures. Papers not conforming to the guidelines and referencing style of DLSU Business and Economics Review will be returned to the author with no comments.

STYLE GUIDELINES

A manuscript should follow guidelines given in the Publication Manual of the American Psychological Association, 5th edition (APA style). It should not exceed 20 pages, inclusive of text, tables, figures, references, and appendices. The manuscript should be typed with Arial or Times New Roman 12 pt. font, double-spaced, on 8½ x 11-inch page size, with a margin of one inch on all sides. The right-hand margin should have justified alignment. Equations must be numbered. Tables should be inserted as an MS Word-formatted table, not as an image. Figures and charts should also be inserted as an MS Excel-formatted figure or graph. Images must be clear and clean, and should be set at 300 dpi for color or grayscale. Footnotes should not be used for reference purposes and should be avoided when possible. All references and/or content notes must be placed at the end of the text. Abstracts should be no longer than 200 words, and it should summarize the objective, methods, results, and conclusion. Up to ten keywords should be provided for easy indexing, and if possible, subject keywords should be indicated to aid in selecting reviewers. A detailed set of style guidelines will be sent to the author once a manuscript is accepted for publication.

SUBMISSION OF FINAL MANUSCRIPT

The author of a manuscript accepted for publication should be submitted electronically, with 5 to 6 keywords and JEL classification codes. The preferred word processor for the final version is Microsoft Word. The final version should also include a data and model appendix of the paper, in appropriate format, together with a metadata such as a brief “readme.txt” file. The data used to derive main results of the paper will also be published alongside the article on the journal website. We are making the data and models available online so as to increase the visibility of and citations to the article.

The author should also submit a short profile (50 words or less) for inclusion in the section “The Contributors”. It should include the complete name of the author, academic and/or professional affiliations, and educational background.
