The External Relations and Internationalization Office (ERIO)
announces the invitation of the Commission on Higher Education

English Engineering Education (e3) Program of Hokkaido University
Graduate School of Engineering, Sapporo Japan
AY 2016-2017

Description

Engineering education at Hokkaido University started in 1876 with a clear objective namely to develop human resources who could take a lead in the development of the newly reclaimed island of Hokkaido. At present it is tasked with a new objective, to ensure that engineering students are educated in the way that prepares them to meet challenges brought about by globalization.

The concept behind the founding of the e3 program in 2000 is to make engineering education accessible to all by utilizing English as the medium of instruction. Since then e3 has been bringing in English speaking students with diverse educational and cultural backgrounds from around the world, a sharp departure from the past when international student population consisted largely of Japanese speaking students from East Asia.
