

Society of Manufacturing Engineers
Student Chapter 200

About Us

The **Society of Manufacturing Engineers DLSU Student Chapter 200**, also known as SME DLSU, is the professional student organization that caters to the **Manufacturing Engineering and Management (MEM)** students of De La Salle University Manila. Under the banner of its mother organization, SME USA, SME DLSU is a world-class community united in empowering Lasallian engineers to become the next generation of leaders in the Philippine manufacturing industry. SME DLSU aims to uphold its mission of **Industrial Consciousness, Legacy Building, and Engineering Competence** through its various activities.

Vision

A community united in helping to mold well-rounded engineers who are the forerunners in the advancement and development of the Philippine Manufacturing Industry.

Mission

Industrial Consciousness

To aid in the development of the Philippine manufacturing industry by improving public awareness and interest in the field through organizing informative events, strategic partnerships, and promotional campaigns.

Legacy Building

To build towards a legacy of continuous improvement by empowering members with opportunities for holistic growth through the organization's events and training programs.

Engineering Competence

To motivate students of the Manufacturing Engineering and Management degree program in striving for academic excellence by communicating the value of competence through career seminars and taking part in curriculum development.

Organizations

Robolympix

Robolympix is a national robotics event composed of four robotics competitions and two seminars that aimed to foster interest in mechatronics and robotics to the next generation of potential engineers. It also sought to partner with industry experts to impart their knowledge and insights about the robotics community, and advancements in the manufacturing field.

300–500
Total Participants

The DMEM Symposium Series is a series of symposiums organized in collaboration with the Department of Manufacturing Engineering and Management. The symposiums seek to inform industry professionals and students about the latest innovations in the industry and academe.

DMEM Symposium Series

3–6 symposiums organized
each year

SME AXIS

SME AXIS, also known as the Accelerating Exchange for Innovation Summit, is a conference composed of competitions, talks, and social engagement activities that aim to serve as an avenue for the technical and professional development of aspiring engineers.

We equip our members with the skills
needed to be internationally
competitive.

Seminars & Workshops

6–9 seminars and workshops conducted each year

Exchange Program Opportunities

Plant Visits

Officers' Day

We don't forget to recognize our officers and faculty.

Officers' Recognition

We foster a community united by passion.

General Assemblies

SME Summer Sportsfest

We never forget to give back to the community.

Juan for All Nationwide Blood Drive

And with your support,
we can continue to do so.

Making the future. Together.
