

At AELOGICA, the opportunities are endless!

We understand that your career is just getting started; therefore, our internship program is an excellent opportunity to gain first-hand experience in cutting edge, lean & agile software development methodologies. You will be exposed to multiple roles and disciplines as well as the ability to work on what interests you.

As an AELOGICA intern, you can expect a dynamic experience that includes:

### **Meaningful work**

- convert your academic knowledge to industry skills
- learn to build web applications in Ruby, Rails and UNIX
- practice agile development technologies such as story carding, pair programming distributed version control with Git, and other related skills
- build your portfolio in open-source projects and learn about cloud deployment in Linux
- experience software development on Mac OS X platform

### **Mentorship**

- designated mentor to help guide you throughout your internship, and work with you to identify goals and how to reach them
- designated mentor to share work experiences that can help you define your career path

### **Networking Opportunities**

- opportunity to connect, collaborate, and socialize cross-functionally among other interns and professionals through our Meet-Up group and active participation in other tech related and social events
- expand your professional network

**Have fun and gain a memorable life experience!**

## **Minimum Qualifications to apply for our Internship Program**

- Currently pursuing a BS or MS in Computer Science or related field
- Demonstrated competence in one or more programming languages
- Possess a passion for technology and curiosity for innovation
- Proactively explored and is highly interested in Ruby on Rails
- With good oral and written communication skills in English
- Contributes to a positive team environment
- Recommendation letter from professor or instructor familiar with your work
- Able to render a minimum of 400 internship hours

## **Internship Guidelines**

- Internship will take place at AELOGICA's software development studio located at the 8th Floor, Ecotower Building, Bonifacio Global City, Taguig
- Developer interns will report to office full-time and render at least 6 to 8 hours per day, as their course load permits.
- Office hours are from 7am to 4pm, Mondays to Fridays
- An allowance will be provided to cover for meals and transportation

Completion of the internship program at AELOGICA (Philippines), Inc. qualifies successful developer interns for employment opportunities with the company immediately after graduation.
